

### **Research Associate Position at North Carolina State A&T State University**

Applications are encouraged for a research associate position focusing on regional climate modeling and analysis with the weather research and forecasting (WRF) model. The principal research responsibilities will be improving the land/snow/ice processes within the WRF model and conducting long-term climate simulations.

The position is based at the Department of Physics, North Carolina A&T State University, with funding support from NSF for a term 1-2 years.

We seek for candidates with Ph.D. degree in atmospheric/geoscience. Modeling and programming experience is required. The starting date is negotiable, but preferably as soon as possible.
